Message of German Embassy

One of the big challenges for the world in 21st century is to face the effects of climate change. It destroys the basis on which human life subsists; drought, leads to shortage of safe water and food. Sea levels rising are already threatening the territories of small island states and vast stretches of coastland

The Federal Republic of Germany is very concerned about it both globally and domestically to combat climate change. So, we have taken the issue with high importance to aware of our responsibility. At the International level, too, we want to create awareness that we have to act now to tackle climate change.

Bangladesh is a country of unique nature geographically. Due to the global change in the world, people of this country have become vulnerable to the impacts of climate change. The reasons are complex and extremely intertwined. Germany and Bangladesh have a very friendly relation and cooperation since its independence. German Embassy, Dhaka provides support to people of Bangladesh in the area of climate change with other supports.

As a part of continuous program on climate change, German Embassy invited Institute for Environment and Development (IED) to undertake programs to raise awareness amongst younger generation on effects of climate change and environment. IED has long experiences to work with students and youths in the areas of environment and climate change. It is our pleasure that IED came forward to implement programs through quiz and art competition for the students at school level.

We appreciate and thank IED for implementing such an effective program covering large number of students of 6 reputed schools in Dhaka city through quiz and 29 schools through art competition. Thanks to the students, teachers, guardians and institutions for their active participation for making the events effective and successful.

This capitalization report will provide a good reflection of successful implementation of the inspiring programs.

Best wishes

Sujit Chowdhury

Senior Advisor on Climate Change

The Embassy of The Federal Republic of Germany

Dhaka, Bangladesh

Message of Executive Director

It is our gratification to publish this capitalization report on campaign program for sensitizing students on the effects of climate change and environment which is a burning issue for Bangladesh like the other parts of the world. To make the students sensitive and responsive in this regard, the program events were carried out during August to December 2014. IED is working for long time in the area of environment, women empowerment, ethnic & religious minorities and citizens' rights. It provides facilitating supports to the students and youths to make them more creative and sensitive through debate, quiz and cultural events, workshop and awareness raising sessions.

As art and quiz activities highly contribute to increase the power of thoughts and ideas; sharpen the capacity of speaking, listening and expressing the thoughts, so IED decided to organize quiz and art events for the students of schools. The theme of the events was the effects of climate change and environment. In the quiz competition the students of 3 Bengali and 3 English medium schools and art competition the students of 29 schools took part with lots of interest. We hope, these events have contributed to sensitize students and take active part to face the challenges of risk due to the effects of climate change and environment. To implement the program, a quizzers' team, senior artists and teachers of schools have provided all necessary supports.

It is our deep appreciation the principals, teachers, students of participating schools and guardians for their active participation to make the events successful. Gratitude to the Artist Muniruzzaman and Professor Nisar Hossain, Dean, Faculty of Fine Arts, Dhaka University for their whole hearted support to the art competition.

Special thanks the quizzers' Bangladesh team members for providing whole hearted efforts to develop the quiz items, questions and made excellent facilitation of all quiz events.

Thanks the colleagues of IED who played proactive roles to implement all program events effectively

Bangladesh and Germany have very good mutual cooperation for long time. We would like to convey our heartiest gratitude and thanks The German Embassy, Dhaka and people of Germany for extending their hands to provide support for the programs. We are grateful to Mr. Julian Kauke, Third Secretary, Development Cooperation and Mr. Sujit Chowdhury, Senior Adviser on climate change, German Embassy, Dhaka for their presence in some events and provide continuous support. We are anticipating continuous support in future. Again thanks all who made the program successful.

Numan Ahmed Khan
Executive Director, IED

1. Introduction

Climate change is no more an agenda for discussion, rather a factual one. During the history of century, global temperature has been increased with significant figure globally due to climate change. Since developing nation, Bangladesh is in the brink of threat caused by global climate change. Normally the country faces a number of major challenges, including poverty, over population and vulnerability for climate change

Institute for Environment and Development (IED) has its strong involvement for long time to the issues related to climate change and environment through campaign, advocacy and awareness rising by involving civil society members, academicians, policy makers, media personnel, journalists, political actors, social leaders, women leaders, youths, students, teachers and other sections of people in the society. On the other hand, German Embassy in Dhaka provides continuous support on the issue of climate change in Bangladesh.

These two organizations have shown interest to work together for sensitizing the youths especially school students on the effects of climate change through quiz and art competition. IED takes the responsibility to organize events with the students of different well reputed educational institutions in Dhaka city and German Embassy would provide financial support in this regard. Then these organizations come to an agreement to implement the program during August-December 2014. An agreement signing event was held on August 25, 2014 at German Embassy office, Dhaka. The agreement was signed by the representative of the Embassy, Charge d' Affaires Dr. Ferdinand von Weyhe and Executive Director of IED Mr. Numan Ahmed Khan.

Charge d'Affaires of German Embassy Dr. Ferdinand von Weyhe, Executive Director of IED Mr. Numan Ahmed Khan and Coordinator of IED Mr. Hamiduzzaman are in discussion before signing the agreement

Mr. Numan Ahmed Khan, Executive Director of IED and Dr. Ferdinand von Weyhe Charge d'Affairs of German Embassy are signing the agreement. Mr. Sujit Chowdhury, Senior Advisor, Climate Change of German Embassy was present

The program organized quiz and art events with an aim to aware and sensitize the students at school level on adverse effects of climate change and environment.

2. Project title

"Sensitizing youths especially school students on the effects of climate change and environment through quiz and art competition"

3. Purpose

Knowledge increased and awareness raised of youths (school level students) on the effects of climate change & environment and empowering them to improve themselves

4. Strategies

- Organize quiz competition events with the students of class VI-VIII of 6 reputed educational institutions in Dhaka city
- Organize art competition event with the students of age between 6-15 years of different educational institutions in Dhaka city

Organized by

Development (MED)

and environment

5. Events

5.1 Quiz competition

Quiz is one of the processes to assess the knowledge, abilities and or skills of a person on specific subject that also leads to sensitize for taking proactive role, developing sense of responsibly and belongingness.

Event steps followed:

- Made communication with different educational institutions and conduct meeting & discussion with the authorities in this regard. Numbers of institutions responded with interest to take part in the events. Finally six institutions (three Bengali medium and three English medium) were selected for the quiz competition events.
- A team of eight members from Quizzers Bangladesh were developed to facilitate the quiz events
- A set of questionnaires were developed by Quizzers Bangladesh.
- The event dates were finalized for each 6 institutions
- A written test was held with the interested students of class VI-VIII for each institution
- For each institution an awareness session on climate change and environment was conducted by a resource person for 10-15 minutes and a power point presentation was made for 30-45 minutes for the competitors, audience students, guardians and teachers
- For each institution six teams were formed taking two students in each team on the basis of written test result
- Quiz competition was held among the six teams for each institution which took about 2 hours. From the result of the competition champion and runner up teams were selected
- Prize and certificate giving session was held for giving certificates to the participating students and certificate & crest to campaign and runner up team members. In this session representatives of IED and the institution were present and gave certificates and crests to the participating students
- Institution wise quiz competition was held in the hall room of its respective institution

5.1.1 Quiz competition at school level

There were total six quiz competition events for school level students held during September 25, 2014 to November 17, 2014. The venue and number of students attended in the event are mentioned in annexure-1. Communication was made with 18 reputed schools and finally 6 schools were selected for quiz competition. The selected schools are: YWCA Higher Secondary Girls' High School, Engineering University School & College (BUET Campus), University Laboratory School & College, Scholastica School (Mirpur), Sunnydale School (Dhanmondi) and The Aga Khan School. The students were very sensitive to take part in the competition. They

appreciated for selection of such an innovative quiz topic on the effects of climate change and environment as it was a different type of extracurricular activity. All students of class VI-VIII were requested to attend the event. It was observed that minimum 46 and maximum 733 students attended even after the class periods. Guardians also showed interest to remain present and good number of teachers was present in each event. In the event 12 selected students took part as competitors and others as audience.

At the beginning an oral presentation was made to sensitize the audience. For this session an experienced resource person was invited. Then a power point presentation was made. The students, guardians and teachers enjoyed the presentation and became sensitized to know and understand the bad effects of climate change.

After the presentation the quiz competition was started. The competitors were very active and excited and the audience enjoyed the competition.

There were also some quiz questions for the audience to involve them in the competition. The whole competition event was lively and interactive. After the competition, prize giving session was held. The crests and certificates were given to the champion and runner up teams and certificates to the rest competitors by the guests. This process was followed in all the schools

5.1.2 Inter school quiz competition

After completion of quiz competitions at school level, inter school quiz competition was held among the champion teams of each school. So, six teams took part as competitors and other students of those schools, teachers and guardians participated as audience. There were four rounds of the competition. Total number of participants was 231. It was held in the venue of YWCA Higher Secondary Girls' School. The event was held with a very lively environment. The participation of the competitors was very sensitive with active joyful attitude. There was very healthy strong competition among the teams. The whole event was very attractive. Lastly The Aga Khan school team became champion and Sanny Dale school team runner up.

Then a prize giving session was held where Mr. Anjan Roy, Eminent Journalist GTV, television channel remained present as chief guest. The crests and Certificates were given to the Champion, Runner up teams and best performer by the guests. The event was ended with grand vote of thanks.

5.1.3 Comments of students, guardians and teachers

During the event, comments were made by the students, guardians and teachers. Some are mentioned below.

Students:

We are very happy to take part in this kind of event. Normally we do not see this kind of event to happen. It would be good if it is possible to make bigger arrangement for the event

- The event process is lively and interactive
- The issue of the quiz is very important for the present situation
- We have been inspired to be more sensitive towards the effects of climate change and environment
- It needs to extend the program country wide
- The presentation was really meaningful and informative

Guardians:

- Really it is very good initiative
- The quiz questions and presentation are very meaningful for enriching knowledge of the students
- There should have the initiative by the school itself regularly in the school
- IED is requested to organize this type of interesting more events

Teachers:

- The presentation is very good and informative
- Take more events in our school
- The event process is interesting
- This is a different type of event and interesting
- This type of program may be organized for the students of other classes
- It will inspire the students to play active role on the effects of climate change and environment

5.1.4 Challenges:

- In some cases it was observed that some teachers are less interested to be involved in extracurricular activities with other organization
- The school activities are so tight that it is hard to get schedule and maintain schedule for the event

ART competition on
Effects of climate change
and environment

5.2 Art Competition

The art competition event was organized on the effects of climate change and environment with the children of ages from 6-15 years on December 12, 2014 in the fine art faculty premises, Dhaka University. It was held in a colorful atmosphere. In the morning the little artists enter in to the premises with holding the hands of their guardians. They took their seats on the open veranda of the building which made a long line of little artists. Total 52 students participated in the competition. They were from about 29 reputed educational institutions of Dhaka city such as :

as : Holy Cross School, Monshi Abdur Rouf School, Udayan Higher Secondary School, Little Angles School, Beer Sraschast Nur Mohammad Public College, London International School, YWCA School, Agroni School, Engineering University Girls School, Scholastica School, Mapple Leaf International School, Viqarunnisa Noon School and College, S.F.X Green Herald International School, Udaya high School, Dhaka high School, Banani Bidyanikatan, B.A.F Shaheen School and College, Dhanmondi Tutorial, Udayan Biddaloy, Azimpur girls School, Lalbagh Model School, Ideal School and College, Mironjullah Govt. Primary school, Monipur High School, Azimpur Adorsha Govt. Primary School, Apple Tree International School, Bottomoly Home Girls high School. For the competition the students were divided in 3 groups based on ages (6-9 years, 9+ - 12 years and 12+ - 15 years).

The art competition was held with very festive mood of the participants, guardians and distinguished guests. Professor Nisar Hossain, Dean, Fine Arts Faculty, Dhaka University; Professor Abul Barak Alvi, Department of Fine Arts, Dhaka University, Senior Artist Moniruzzaman were present as Guest. The guests visited the participants physically by walking around them during art period. They became impressed to see the participants' concentration towards drawing arts. After completion of drawing, the individual arts were collected. After collecting the individual arts, a judge team of 4 members headed by eminent artist Professor Abul Barak Alvi selected 3 best (1st, 2nd and 3rd) arts from each group.

Then a prize giving ceremony was held. crests, books and certificates were given to 1st, 2nd and 3rd positioned students from each group and certificates and books to all other participants by the distinguished guests. The event was ended with vote of thanks.

It is noted that Mr. Julian Kauke, Third Secretary, Development Co-operation of The Federal Republic of German and Mr. Sujit Chowdhury, Senior Advisor, Climate Change of German Embassy, Dhaka remained present in the Art competition event. They enjoyed all the activities of the event and appreciated for the participation of large number of little artists and their sensitization. They interacted with the students, teachers, guardians and guests. They were impressed to see the colorful arts expressing the effects of climate change and environment.

5.2.1 Comments of students, guardians and teachers

- It is very exciting initiative to make the children sensitive towards the effects on climate change and environment
- The colorful event inspired the students and guardians to take part in the competition
- The event has made big gathering of little artists where they exchanged their potentialities
- The little artists have got the opportunity to come in touch with nationally famous artists

5.2.2 Challenges:

- Manage big gathering of little artists as they came with their parents, guardians and associates
